

PRESS RELEASE

New York Container Terminals Staten Island, New York

Rubb, Inc. recently completed a second structure for New York Container Terminals located on Staten Island, New York.

The structure, a high walled BVE building measuring 50' (15.24m) wide by 50' (15.24m) long with a 37.4' (11.4m) sidewall, will primarily be used for maintenance on top loaders, the equipment used to pick up and move shipping containers. In addition to standard accessories such as personnel doors and a full electrical package, this facility utilizes two large, manually operated bi-parting PVC doors measuring 30' (9.14m) wide by 39' (11.90m) tall.

New York Container Terminal (NYCT) is a full service container and general cargo handling facility which boasts one of the highest volume cargo capacities of any facility in New York Harbor.

The Rubb organization, with production facilities in the United States, Great Britain, and Norway, is recognized as a world leader in the design, development, and manufacture of relocatable structures.
